

MAPOFFICE : Automated word processing

MAPOFFICE

MAPOFFICE was originally designed to replace **Office Vision** (OV400) and lets you **create sophisticated documents** just like in OV400. **MAPOFFICE** requires **MAPREPORT** and **MAPDRAW**.

☉ Main product features for MAPOFFICE

- Design OV400-like documents
- Process documents created with OV400 (text, conditions, styles, merge fields, queries)
- Word processing (support for merge fields and conditions)
- Merge fields and letters
- Support for page breaks (without cutting paragraphs)
- Support for page layout, justify, overlays, logos, signatures (including conditional logic)
- Support for dynamic tables
- Support for QUERIES
- Generate PCL5 or AFP output spool files
