

MAPSEND : Automatic emailing

MAPSEND

MAPSEND makes it easy to email your spool files **natively from the production system**. **MAPSEND** emails remapped spool files in PDF* without leaving the platform.

By retrieving the recipients' addresses from the input spool file or a database, **MAPSEND automatically emails remapped spool files in the PDF* format**, natively from the system i using an SMTP client on the machine. Also, **MAPSEND** makes it possible to enclose any attachment in your mail.

☉ Main product features for MAPSEND
